

Millwright Mechanic

JOB DESCRIPTION

This position supports our facility by maintaining and repairing equipment, both in a shop and in the field. Equipment can consist of conveyor belts, rotating mechanical equipment, bearings, pumps, motors, piping, steel equipment, crushers, vibrating screens, dryers, and any other equipment associated with a heavy industrial facility.

Candidates need to be able to install, maintain, troubleshoot, and repair mechanical equipment. Strong mechanical aptitude, welding, fabrication, machining, pipefitting, and some electrical experience is required. Additional experience with man-lifts, forklifts, backhoe, skid steer and lifting equipment is preferred.

Position is full-time. Shift work, however normal work schedule is day shift. Must be available to work overtime, which could include occasional weekends, nights, and holidays.

Generous benefit package, including medical/dental/life insurance, 401k matching, paid time off, and paid holidays. Base pay will be based on experience. Post-offer drug test, physical, and lifting evaluation is required.

Job Type: Full-time
